This fully automatic 35mm SLR Camera also has manual exposure control for exceptional pictures under exceptional conditions at an exceptionally low price

$176.50

In average light, the KSX camera meter automatically sets exposure accurately so you get the picture you expect.

In unusual light, such as strong backlighting as shown, the KSX manual override mode allows you to adjust exposure to compensate for the strongly back-lit scene.

Viewfinder shows: shutter speed scale (A), meter needle indicator (B), and split-image focusing (C)

Smoker's Gift Shop

(A) Deluxe Briar Pipe Set

Experienced pipe smokers recognize briarwood as one of the finest pipe-making materials, and appreciate its light weight and durability as well as the sweet smoke it gives. Made of Mediterranean briarwood, carefully selected for quality, size, and grain, our briar pipes are shaped, sanded, waxed, and polished by European craftsmen, then are given hard rubber stems. The result is a cool-smoking, well-balanced pipe that needs very little "breaking in."

SET COMPOSITION: One handsome, hand-sculptured bent-stem pipe with a genuine meerschaum bowl, one sporty straight-stem pipe covered in fine pigskin, multicolor pipe cleaners and an attractive gift box. Imported.

learn to love words, numbers, much more, and have fun too!

New at Sears . . .
Our exclusive Quiz-A-Tron with 380 learning activities

Aids young children in the recognition of right answers, shapes, sizes, with basic math and much, much more. Quiz-A-Tron helps your child learn in a natural manner and have fun at the same time!

How the Quiz-A-Tron works:

- **A** Red, yellow and blue buttons let you program unit to quiz by a color code
- **B** Red light beside row of choices flashes when unit wants answer and if you're right
- **C** Page selection button lets you choose quiz
- **D** Answer buttons correspond to 4 choices in each answer row. Choose answer, push matching button
- **E** Speed control switch lets you choose between 3 speeds; determines time child has to answer

With the Quiz-A-Tron, your children will find learning activities so enjoyable, they won't realize how educational their fun has been

TEACHING FUNCTION: For ages 4 to 8. Combines a question book containing 38 pages and 380 questions with an electronic teaching machine. Insert book in Quiz-A-Tron, choose a quiz using page selector, program unit to page by color code on page and then choose a speed. Speed determines the time your child has to answer questions and can be used to develop a progressive learning experience. Each color page has ten multiple-choice questions. The child pushes answer button to correspond to one of four possible answers. If right, a red light flashes and a three-tone melody plays. If wrong, a buzzer sounds. For a fun incentive, if all ten questions are answered correctly the lights will flash and you'll hear a musical fanfare.
CONSTRUCTION: White and yellow plastic case, multicolor front. 10½x7½x2 inches deep. Requires 8 "AA" batteries (not included). Order 4 battery packages, right. Imported.

electronic Chess games

Introducing the Fidelity Electronics Chess Challenger® that thinks, speaks and senses where every piece is moved

"Queen from d3 to b5 . . . check and mate"

Infinite skill level that's faster and smarter than ever with Fidelity's strongest chess program

Are you an expert, looking for a challenge? Or a novice, trying to improve your skill? **Sensory Voice Chess Challenger®** will play with you "on your own turf." Choose from 9 levels of difficulty or switch into the "infinite" mode for the ultimate challenge. After you have made your move, the computer begins "thinking." It searches for its next move and actually thinks ahead, planning future moves according to the selected skill level. The computer responds faster than ever, based on complexity and game progression.

Sensory Voice Chess Challenger®
$319.99

It "senses" your moves without keyboard entry and shows you its moves with lights

You can devote all your attention to the game without the distraction of entering each move on a keyboard. Simply press your piece into the new square and the computer will sense the move and enter it. If your move is illegal, lights on "to" square will flash. After you make your move the computer's move will be indicated by flashing lights on the squares it chooses, in addition to vocal command.

Press one of the piece keys and the computer will light the path to illustrate how that piece is moved

With Sensory Voice Chess Challenger® you can also set up your own specific chess problems and let the computer solve them. It can also be used to teach you how to play chess.

Compete with the masters or watch them play . . . 64 all-time great games are programmed in the "brain." 64 of the world's greatest chess games are programmed into the computer. Games played by Morphy, Capablanca, Spassky, Fischer and other masters, dating as far back as 1918. You can test your own playing ability by replacing these great games . . . you be the "champ" or the "challenger." Make a right move and the computer will score a point for you. Make the wrong move and the computer will show you the way the master played it. Or let the computer do all the work while you learn by observing the games.

Solid walnut base with DuPont Mylar® polyester film playing surface. 13x11½x3⅜ in. Magnetic pieces are made of hand-carved wood, Staunton design. King is 2¼ in. high. Plastic carry case. 120-volt, 60-Hertz AC. UL listed. 6-foot cord, adapter. Solid-state design.

Its 50-word vocabulary tells you every move and capture

It's the next-best thing to a perfect opponent . . . the computer not only indicates its moves by lights, it actually tells you all of its moves. And its full 50-word vocabulary lets it tell you all captures and repeats all your moves. In addition, the computer will tell you when it is your move and tease you (quite tactfully, of course) when it thinks you are taking too long to decide on your next move.

Chess clock shows time elapsed or time remaining

The computerized chess clock tells the time remaining for each player and the elapsed time of the game . . . all in clear, easy to read LED readout.

Sensory Challenger® "8"

without batteries

You can choose a low-priced Sensory Challenger® without voice or clock

Our low-priced **Sensory Chess Challenger® "8"** has the same great sensory system as our Voice Challenger . . . it senses every move and records it automatically. Basic playing procedures are identical, with Sensory Chess Challenger® "8" indicating moves and captures with lights and tones. For example, you will hear a single tone each time you press a key, a double tone when the computer responds. Challenger® "8" has 8 skill levels including "Mate in Two" and "Chess by Mail." Molded plastic housing with DuPont Mylar® polyester film playing surface. 11⅛x10⅜x2½ inches. Magnetic pieces of plastic, Staunton design. King: 2¼ in. high. 120-v., 60 Hz. AC. UL listed. 6-ft. cord, adapter. Plug into wall outlet or run on 4 "C" batteries, order from page 639. Solid-state.

FOR AGES: 7 years to adult.

ORDERING INFO: See warranty note below.

49 YN 65634—Shpg. wt. 4 lbs. 6 oz. . . **$134.99**

Chess Challenger® "7." Seven levels of playing difficulty. Play against the computer or watch computer play itself. Change sides on any move.

KEYBOARD, PLAYING BOARD: Reset key starts or cancels game. Depress Enter key to register your move with computer. Press Position Verification key to verify position of each piece. Use Double-move key when you make multiple moves. Clear key erases moves if Enter had not been pressed. Press Level key at any time to change level of difficulty. Problem Mode key used to solve specific chess problems . . . like "Checkmate in 2." Signal for "Check" lights up when the computer has you in check. "I lose" signal lights up when computer is checkmated.

PIECES, HOUSING: DuPont Mylar® polyester film playing surface. Magnetic pieces, plastic Staunton design. King measures 2¼ inches high. Attractive simulated wood-grained housing. Measures 12⅛x8x1 inch high.

ELEC. INFO: 6-ft. cord, adapter. 120-v., 60 Hz. AC. UL listed. Solid-state.

electronic Table-top games

"4 spades" . . . this game actually talks to you using accepted bridge terminology

Electronic scanner "reads" special cards

New improved program uses all popular conventions

Voice Bridge Challenger automatically uses Stayman, Gerber and Blakwood. Assign each pair of partners one of the 50 other conventions that the computer knows. Follow your favorite conventions while entering your bids. The machine will automatically display its own bids while announcing them clearly and audibly, using the convention you selected for it. When the bidding is completed, the computer announces the contract and displays it on the screen and play begins. You also have the option to replay the hand; just designate any new combination of human and machine players for full duplicate play.

Voice Bridge Challenger® can play as your partner, your opponent or both

Need a fourth for bridge? Or a second, third and fourth? Or would you rather watch while four "others" play? Voice Bridge Challenger is always ready for a game, whether you're short a player or your bridge club is curious to see how a computer would have played their hands. Just tell the machine which positions to play (N, E, S, W), then deal the custom cards. As each computerized player asks to see its hand, pass its card—face down, one at a time— over the electronic scanner, then place them on one of the three green felt playing fields provided. In this manner, "everyone " sees only his own cards.

Display shows bidding and play order

Voice Bridge Challenger® includes 3 green felt playing fields

Voice Bridge Challenger rejects illegal bids, displays reneges, lets you review bidding (and the last trick played) and indicates vulnerability . . . all instantly. 100% solid state with solid hardwood housing. 13¼x8½x1⅛ in. high. Comes with 2 decks of custom playing cards, carrying case, 9-volt adapter and 6-ft. cord for use with 110–120-v., 60-Hz. AC.

FOR AGES: 12 years to adult. One or more players.

Electronic Bridge Bidder™ demonstrates bidding . . . so compact you can take it along to a game

$174.99 without batteries

Allows a novice player to bid with more expert players.

HOW IT WORKS: Enter your hand and the Bridge Bidder™ will suggest the bid, enter bids of other players and Bidder will re-bid hand. Uses all conventions available in the Bridge Challenger® sold at left. Reproduces randomly dealt hands for practice bidding. Bridge Bidder™ will display interpretation of any bid, including its own.

(1) Follow Me

You may repeat the computer's light, sound sequence once or twice but with each turn, the series becomes longer, faster and more challenging

Reduced from our 1980 Toy Book, page 667.

Follow the computer's random series of lights and sounds exactly by pressing the correct buttons in the correct sequence. It's easy at first but the excitement increases as each series becomes longer, faster, more complex. If you fumble, Follow Me signals loud and clear that you are out of the game. If your memory outsmarts the computer, you are rewarded with a victory tune. The computer will program the sound and light series, or set your own to doubly foil your opponent. Follow Me always remembers the last and longest sequence played and will recall it at a push-button touch. 4 skill levels tease even experienced memories. Up to 4 players.

CONSTR: Plastic housing is 5 inches in diameter and 2 inches high.

FOR AGES: 6 years to adult.

ORDER INFO: Instructions included. Requires one 9-v. battery or adapter; both sold below. For warranty, see pg. 667.

(2) Numbers Game

Strain your powers of logic and deduction by trying to break the computer's 4-digit code

Reduced from our 1980 Toy Book, page 667.

You've been challenged to break a secret 4-digit code by a hand-held computer. Employing all your powers of logic and deduction, you test different numbers in different sequences. After every entry, the computer clues you to which numbers are correct and in the right sequence until the code is broken. Let the computer set a mind-boggling code or develop one yourself for an unsuspecting opponent.

CONSTRUCTION: Compact plastic housing measures 5½x3½x1 inch high. Vinyl carrying case and scorepads included.

FOR AGES: 8 years to adult.

ORDERING INFORMATION: Instructions included. Requires one 9-volt battery or adapter; both sold below. For warranty, see pg. 667.
